DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10 January 2007 has been entered.

Allowable Subject Matter

2. Claims 15-18 are allowed.
3. The following is an examiner's statement of reasons for allowance: The prior art does not teach or fairly suggest an apparatus for producing electronic video signals as claimed. While it is known in the prior art to arrange pixels on an image sensor by offsetting alternating lines (e.g. Suga et al., Lu et al.) and to readout pixels using multiple readout registers (e.g. Suga et al., Hashimoto, Uchiyama et al.), the prior art does not teach a combination of offset pixels on alternating lines and individual readout registers in which the registers solely receive pixel signals from a single color. Suga discloses an image sensor including offset pixels on alternating lines and individual readout registers, however the readout registers of Suga merely control readout by applying pulses to appropriate readout gates and do not receive pixel signals. Uchiyama discloses individual readout registers, however the pixel signals are transferred through

upper registers to arrive at lower registers (e.g. Figures 3 and 4). Ito discloses a solid-state image sensor device including individual readout registers (Figure 1), however Ito does not disclose offsetting alternating lines by a half pixel spacing or repeating R, G and B patterns on successive lines. Furuhashi discloses an image sensor device which includes individual readout registers which only receive pixel signals of a single color and offsetting pixels on alternating lines (Figure 1), however Furuhashi does not disclose repeating R, G and B patterns on successive lines as claimed. Therefore, while individual components of the claims are known, the combination as claimed is neither taught nor suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
